

YAMADA et al.
Appl. No. 10/660,756
Response to Office Action dated July 3, 2006

AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraph beginning on page 20, line 5 with the following amended paragraph:

An embodiment of the television (hereafter abbreviated to TV) broadcast program recording system of the present invention is described next while referring to FIG. 1. The recording system for TV broadcast programs in this embodiment comprises a mobile communications device 20 capable of receiving TV broadcasts, a program recording device 30 for recording TV broadcast programs, and a communication control device 40 controlled by a communication carrier 8, and a communication network connecting these components. This communication network as shown in FIG. 1, comprises a gateway 6 connecting the communication carrier 8 with the program recording device 30, as well as an Internet 5, and a public wireless line 7 connecting the communication carrier 8 and the mobile communication device 20.

Please replace the paragraph beginning on page 31, line 20 with the following amended paragraph:

Next, in step S010 of FIG. 4, the process awaits termination of call or recovery from radio wave difficulties. In step S011, a judgment is made whether the call is terminated or radio wave difficulties are recovered. When decided that call is terminated or radio wave difficulties are recovered then a judgment is made in step S012 whether the "post-recovery [[pos -recovery]] setting" is made. This "post-recovery [[pos - recovery]] setting" is a setting which is made in advance to execute for example, recording-stop, recording-continue, or recording/playback after termination of call or recovery from radio wave difficulties.

YAMADA et al.

Appl. No. 10/660,756

Response to Office Action dated July 3, 2006

Please replace the paragraph beginning on page 32, line 7 with the following amended paragraph:

When the "post-recovery [[pos -recovery]] setting" has been made, the process proceeds to step S014. However, if the "post-recovery [[pos -recovery]] setting" has not been made, then in step S013, the user is requested to make the post-recovery setting. When the user makes the post-recovery setting, the process proceeds to step S014.
